WORK EXPERIENCES

Software Developer

Lambda3 | TIVIT

May 2021 - April 2023

Engaged in various projects with both domestic and international clients. Worked in agile, self-managed, multidisciplinary teams. Committed to delivering high-quality development work adhering to best practices, maintaining test coverage above 80%. Proficient in software testing, GIT, Azure, and Jira. Experienced in utilizing React-Native, .NET Framework, Next.js, and Nest.js. Additionally, possess knowledge of financial/banking (Master Bank), human resources (RunaRH Mexico), and healthcare (SaúdeID Grupo Fleury) business rules.

Fullstack Developer

ViaSoft

Dec 2020 - May 2021

Engaged in the ongoing development of the Nela product, an ERP system for Human Resources management. Working with EmberJS, SailsJS, KnexJS, MySQL, Bootstrap, Bitbucket, Jira, and Confluence. Responsible for implementing client-requested requirements and customizing features, while performing fullstack development. Consistently delivered customized modifications to clients, resulting in an overall satisfaction rate of 92.8% (measured via Movidesk). Played a key role in scaling the software and refactoring existing code to accommodate the expansion from 1,267 monthly users to over 500,000 users.

Back-End Developer

PRTE - Tecnologia e Soluções

Feb 2018 - Dec 2020

Worked in a fast-growing environment with multiple projects and served various clients. Proficient in Ruby on Rails, API development, service integration, and database creation and management. Experienced in working with Agile methodologies and self-managed teams that foster high autonomy. Developed Plugins for CMS WordPress, utilizing CSS, Bootstrap, JavaScript, EcmaScript6, JQuery, and React-Native. Also gained expertise in Docker for containerization.
